## Class VI (MATHS )

| MONTH | CHAPTER | CONTENT | ACTIVITIES |
| :---: | :---: | :---: | :---: |
| April | Natural numbers and whole numbers <br> Basic <br> Geometrical concept | Roman numerals,Successors,Predecessors,Distributive property of addition, Rounding numbers <br> Ray, line, linesegment, Parallel lines, concurrent lines, collinear points | Role play showing numbers <br> whole numbers activity using cardboard. <br> Relation of parallel lines, concurrent lines with dailylife |
| MAY | Linesegment <br> Angles | Construction of line segments <br> Linear pair,vertical opposite angles, adjacent angles,complementary angles, supplementary angles | Relation of line, ray and line segment with daily life <br> Representation of different angles using match sticks |
| July | Factors and multiple <br> Circles | Prime numbers, composite numbers,Twin primes <br> HCF,LCM, Divisibility by different numbers,prime factorisation <br> Radius, diameter, arc ,semi circle,quarter circle | Activity related to pairs of twin primes from 1 to 100 <br> To show parameters of circle |
| August | Integers <br> Statistics | Number line,Sum, difference, Multiplication and division of integers, exponents <br> Bar Graph, Pictograph, Tally marks | Representing integers in square cuttings of red and blue colors for +ve and -ve <br> Representation of data on a bar graph related to daily life activities |

| October | Ratio <br> proportion <br> and unitary <br> method <br> Percentage <br> and its <br> applications | Means, Extremes, simplify of ratio,unitary methods <br> Simple Interest,Profit and loss, Selling price, cost price, percentage | Daily life activities <br> Daily life activities |
| :---: | :---: | :---: | :---: |
| November | Introduction to Algebra <br> Linear <br> Equation | Addition, Subtraction, like numbers,constant and variables <br> Solution and verification of linear equation | Addition and Subtraction by using like numbers and like objects <br> Daily life activities |
| DECEMBER | Pairs of lines and transversal Triangles Construction | Alternate and corresponding angles. <br> Angle sum property, interior adjacent angles, interior opposite angles <br> Construction of different angles, construction of perpendicular bisector, angle bisector | Showing alternate and corresponding angles using same colors in same pairs <br> Cut and paste activity using different type of triangles <br> Construction using compass |
| January | Perimeter and Area | Perimeter and Area of rectangle and square | Perimeter and area chart of rectangle and square using color sheets and sticks. |
